Nose clip for face mask. Better isolation around the nose and prevent of fogging glasses.

If you dont find correct size, leave a comment.

Version 1.1 - longest "teeths" with small bead for better fit

Version 1.3 - wider front tooth; radiuses added

Version 1.3_small - for smaller nose :-)

Version 1.3_wide - for wider nose

FLAT Version added:

Printed from PLA can be shaped using hot water:

1. Print from PLA! (100%infill)
2. Prepare some container (plate, bowl ...), paper towel and hot water.
3. Pour hot water over printed part and wait few seconds (10 or 15).
4. Carefully pull out part from water (use twezers) and dry it quickly (to avoid burning by hot water.)
5. Place it ower your nose (down worry, dry part wont burn you) and shape it.
6. Wait until it cool down (1 minute) or use cold wet napkin.
7. Enjoy your personal nose clip :-)
